## COUNTERTOP CARE & CLEANING

- For daily care of your countertops, you can use Clorox wipes, soap and water, or even a hose to clean them off.
- For deeper stains (or grease), use a heavier mixture of Dawn dish soap and water.
  - Do not be alarmed if they seem darker immediately after use or when wiping/spraying them down, this will typically lift as the countertop dries.
- It is recommended that you seal your countertops yearly. This is easily done with the Ager Tiger Color Enhancer Sealer for Exotic Stones (can be found on Amazon) - just follow the instructions on the bottle.

## STAINLESS STEEL CARE & CLEANING

- For daily care, any stainless steel cleaner will do.
- For deeper stains, we recommend Bar Keepers Friend Soft Cleaner (can be found on Amazon), just follow the direction on the bottle.

As with any suggestions, use your better judgment on use of products/care. These are what we've personally used and are not an endorsement for the product, nor are they a one size fits all for all cleaning/stains.
